Accessibility check from source

barrierlab on examples/page.html · no browser

About this report

Findings, counts and line numbers come from barrierlab 's --json output for its own examples/page.html (one run, unedited). barrierlab does not write PDFs; this request was assembled from that output. The recommendations are written by hand.

Result

Failed	Needs review	Untested	Rules not run
5	8	16 by hand	10

Failed checks

HIGH **forms/label-missing: The input has no label.**

Line 17. WCAG 1.3.1, 3.3.2, 4.1.2.

Give the input a visible label tied to it with for/id, or wrap the input in a label element.

HIGH **links/name-missing: The link has no accessible name.**

Line 15. WCAG 2.4.4, 4.1.2.

Put text in the link, or an aria-label if it only holds an icon.

HIGH **buttons/name-missing: The button has no accessible name.**

Line 18. WCAG 4.1.2.

Put text in the button, or an aria-label if it only holds an icon.

HIGH **images/alt-missing: The image has no alt attribute.**

Line 14. WCAG 1.1.1.

Add an alt attribute: a short text that says what the image means here, or alt="" if it is purely decorative.

HIGH **contrast/text-insufficient: The text reaches a contrast ratio of 2.59:1; 4.5:1 is required for normal text.**

Line 13. WCAG 1.4.3.

Darken the text or lighten the background until the ratio reaches 4.5:1.

To review

Findings that need a human decision

Rule	WCAG	Line	Message
headings/none	2.4.1	2	No headings, no main landmark and no skip link; if blocks repeat across pages, nothing bypasses them.
landmarks/main-missing	–	2	The document has no main landmark.
landmarks/navigation-missing	1.3.1, 2.4.1	2	The document has no navigation landmark.
landmarks/banner-missing	1.3.1, 2.4.1	2	The document has no banner landmark.
landmarks/contentinfo-missing	1.3.1, 2.4.1	2	The document has no contentinfo landmark.

Rule	WCAG	Line	Message
keyboard/skip-link-missing	2.4.1	2	No skip link found that bypasses repeated blocks.
forms/purpose-missing	1.3.5	17	The field "" seems to ask for information about the user but has no autocomplete token.
landmarks/content-outside	–	13	Content is not contained in any landmark.

Checks only a person can do

16 manual checks, never reported as passed

- every alt text says what the image means in its place, and only purely decorative images have alt="".
- any time limit can be turned off, adjusted or extended.
- submit the form with errors — each error is named in text, next to its field, with a suggestion how to fix it.
- with the keyboard alone you can move into and out of every control, dialog and embedded widget again.
